### Card Of Mind

Before the show remove a deck of cards out of the box. Give the audience a deck of cards and ask to get it exactly shuffle. Shuffled deck of cards get from the audience and also the shuffle. Shuffle the cards in such a way that you can preview and save the card lying on the bottom of the deck. Continuing shuffle, move saved the card on top of a deck of card. After shuffling the deck set it on the table. Now pick up the piece of paper and a pencil. Save on paper card which lies on top of a deck of cards, and let the audience know that you have saved card is a card chosen by you in a random manner. Now unfold the card on the table. Spreading from left to right. Ask one or more people to focus together and chose one of the cards and slid it to the middle of the deck without looking at her. Once they do collect the remaining cards and place the left hand. Card selected by the audience leave on the table. Educate the audience that on the table remained only one card selected by the audience in a random manner. On the table remained so card and a piece of paper on which is written your random card. Now you are entering the next stage tricks. Place now lying on the table tab at the top of the deck, you hold in your left hand. Turn a piece of paper on which is written your card and show the audience what card you have chosen at random, in fact, written on a piece of card is a card while shuffling suspect at the beginning of tricks. Grasp the card overall method 'double lift' and lift them cards, but keep them in such a way that the audience had imagine that hold only one card. The audience will guess that the card with the top of the deck is the same, he pulled out from inside the waist and compare with what you wrote earlier on a piece of paper before drawing a card from the deck. Turn the pack of cards that you hold in your left hand pictorial forward and insert the cards held by 'double lift'. Slide the card back on the table (from left to right). I put the card in front of an audience selected by them and the same piece of paper next to each other. In this way, you proved that the audience also portafi provide your choice and you realized them about their mental abilities.

### Double-Triple Lift

Hold the left hand card, then shuffle. Give someone else a deck of cards to shuffle. Receive a deck of cards from the viewer. Now grab three cards in his right hand, but grip it as one card. Turn to hold these three papers is that to be able to catch these three cards as a single, first you have to grab the third finger of the left hand upper right corner of the deck and thumb lower left corner of a deck of cards. In this way you will be able to take three cards as one. Once you have grabbed all three cards as one, show the first card facing the image to the viewer and make him remember her. Put the three cards as the one on the deck of cards face-down. Now take the inside waist insert one card from the top deck, widow will have the impression that inside waist have any card you remember. Shake the pack of cards. Grasp the two cards as one of the top deck by the same method as you did before, and show that the card was on top of the deck. Again, put the two cards as one to believe and grab the top card and place it inside the waistline. Again shake the waist and turn the top card. The audience will be amazed that a mysterious but simple way for you the card can be transported from the middle deck on top of the deck. At the end shuffle the cards and give widow to check.

Kings - Aces

Remove from the deck of cards all the kings and aces. Place the cards on the table face up so that the audience could see well card. On the left side Polz four kings, and on the other side lie four aces, place the cards in a row. Tell someone in the audience, he touched a finger to one card. The voice said, what a card. Now collect all the cards in your hand and proceed as follows - You will be arranged alternately card. The first card slide down second place above and so to the end. Take protruding card in advance and ask if this package is the card viewer. If not then put the package on the bottom, if so, on top of other cards. Repeat step three times. Now take the cards in your hand and begin to decompose in this way. Start to put one card on the left, then the second card put on the right, follow that to the last card. Invert pack of cards lying on the right side of the face up. Take a package lying on the left side and start to break down the card again from the right, then left. Turn right package. Take the last two cards and put the first tab on the left side, and the last on the right. This will be the last before your card.

### Triple Gear

Shuffle the decks of cards any method chosen by himself. Preview of the card lying on top of the deck. Then grab the top half of a deck of cards and set aside by putting it on the right side. The file you have replaced share again in half and the half put the package on the card lying on the left side. Now grab the file lying on the left and put all the cards on the package lying on the right side. Thanks to this trick, the card lying on top of the deck, the ratio goes tm again.

### The Last Card

To perform this trick, you will need talkii 52 cards. Grasp the decks of cards and shuffle it any way, but do it in such a sposón, you can after the end of shuffling know the value of the back of the card. I now remember this little secret that every figure in card tricks is the number ten, as is the number one, and the remaining cards make up the sum of the numbers in what is attributed. Why is it like that? For reasons of mathematical pressure characteristics deck of cards. Now let chieftain choose any three cards, in addition to the bark lies on the bottom of the deck. And for example, if one chooses from the deck of the King, Nine and five, is on each card put enough cards to total sich sum was 16. King + 6 cards, Nine + 7 cards, Five + 11 cards. After deduction of the sum the cards retry the cards that have been removed from the deck by the viewer, that is, the King (10), Nine, Five giving a total sum of twenty-four. Count so the package hand-held twenty-four cards, and the latter is a card is the one that you remember at the beginning of tricks.

### Bottom Hindu Shuffle

To perform this trick you will need a deck of 52 cards. To make things look better. Before you perform a trick, you can place your cards in your own order. In the original Hindu Shuffle you grab cards from the top. In the bottom of my Hindu Shuffle, you must grab the right hand card from below and do so for as long as it ends in the right hand of the card. In this way, you will perform a shameless shuffling of the deck with the method of the Bottom Hindu Shuffle while preserving the order of the stacked cards for further tricks.

Two deck of cards - Two people

This card trick is a very simple trick. It is based on simple mathematical rules. Do not worry if you're weak in math. All you have to do is follow the procedures. Now remove the cards from the box and shuffle them by any method you choose, or give the card to someone in the audience to shuffle it will increase the rank of tricks and prove that the deck of cards is not in any way arranged before the show. Now divide the deck of cards into two smaller decks. Remember that two decks of cards have the same number of cards, or that each deck of cards must have 26 cards. Now give one deck of cards (26 cards to play) first person and second deck of cards (26 cards) to the other person. Ask now that each person chooses a number from one to ten, they should be different numbers, turn their backs on the audience, and the audience will agree on who gets the cards to play. Now you turn to the audience and take the rest of the playing cards from the first person. Turn the cards one after the other and make sure that the card selected by the viewer matches the number. You collect the cards from the table, turn them over, and place the rest of the cards on your hand on those that lie on the table.
